

N ational Fire Plan

H azardous Fuels R eduction
W orking
2003

Sponsored by the National Fire Plan, the Shoshone National Forest, using a local timber purchaser and the Youth Conservation Corps, was able to complete a firewise fuels mitigation project at the Fremont County Youth Camp. First, the merchantable post/pole and small saw logs and firewood were removed and then, the purchaser, Bill Hardy, dozer piled where he could.

This is when Amy Sheldon, Eric Wood, Brett Heller and Jay Slagowski of this season's Youth Conservation Corps (shown below) completed the thinning project by doing more thinning and hand piling of the slash. The project removed infested trees that were causing safety and fuels hazards in the County's Youth Camp.
