Making a Difference Community Wildfire Protection Plan Minnesota

The Minnesota Division of Forestry (MDOF) is working with 87 counties to develop community protection plans to meet the requirements for FEMA funding. The MDOF is also working with 100 communities on Firewise programs and assisting these communities with the assessment process. The State will continue to support communities through the planning process. No CWPPs have been developed yet, but discussions have begun regarding the development of CWPPs on the Superior National Forest and the involvement of communities.
